## LED CLOCK FOR MIRRORS

Enhance wall mounted mirrors with a genuine integrated clock module designed for hospitality, health care and commercial applications. A bathroom mirror is the perfect location for an integrated clock viewable through the mirror.

You have the option of two programming remote controls that give you the flexibility to adjust the settings of the clock. The Automatic Clock Programmer provides the fastest method for programming the clock modules. Simply point the programmer remote toward mirror and it synchronizes all the settings automatically. The Manual Clock Programmer uses the clock module's display to manually make adjustments.

• CE

SPECIFICATION
Solution shall consist of a clock module and programming remote control tool. Clock module is designed to integrate into a mirror surface without any visible window or etched digits in the mirrored surface. When off, the clock is not visible. Programming remote tool option requires the capability to automatically synchronize with the clock module for fast programming. System shall allow for 12 or 24 hour clock settings and an electronic flip display. Display dimming and battery backup required.

LED CLOCK FOR MIRRORS

CONSIDERATIONS

• A clock programming remote control is required to program the clock module.

DESCRIPTION	POWER REQUIREMENTS
