TESTS AND RESULTS
Test Conducted:

Film adhesion testing under condition of temperature & humidity with reference of SGS in-house method

Scope:

/

General Test Condition:

The following test program was conducted in a laboratory environment maintained at 15°C to 25°C and 50%±5 RH. The sample was individually tested after conditioning in the test environment for at least 24 hours prior to conducting the test.

The complete detailed procedures may be found in the referenced specification and are only summarized herein. The results obtained for each of the applicable tests are presented in their respective section describing the procedures below.

The tests were carried out in the following order on the same sample.

Test	Test Items and Requirements	Test Results
1	<ol style="list-style-type: none"> 1. Visually check the sample and record any defect before test; 2. Place the sample in the test condition for 7 days (85% relative humidity at 32°C); 3. Take out the sample from the humidity chamber and visually check any surface change on it, then apply a force of 50N to the weakest positions of glass edges at any direction and maintain for 15s. 4. Record any damage. <p>No any surface change on the sample shall be found after temperature & humidity test; No any damage on the sample shall be found after separate force test.</p>	PASS

Remark:

1. For the sample information and pictures, please refer to the following page.
